

COVID 19 Statement

18th March 2020

Dear Customer,

We are living through an unprecedented time, with uncertainty caused due to the outbreak across the world of COVID 19. Apex Pumps remains open and operational, many of our pumps go into critical applications across the world. We are committed to providing our bespoke offering of pumping solutions whilst protecting the wellbeing of our employees, suppliers and customers alike.

We are continuing to monitor the situation, following the advice of the UK GOV, NHS and their experts.

Face to face meetings have been reduce to a necessary minimum and where possible we are utilising phone and video conferencing to conduct business.

We have been contacting all our major suppliers, to ensure that our supply chain is taking measures and remains robust.

Cleaning and additional hygiene regime / provisions have been introduced on site to limit the risk of further spread of the virus. All staff are reminded to wash hands for at least 20 seconds, clean personal workspaces and keep distance from each other. As per the government guidelines.

We're embracing these enforced changes to our business, keeping the bespoke needs of our customers at the forefront of our business. If you need any further information please contact us through the normal channels.

Andrew Simpson

Managing Director
